

ELECTRICITY MARKET GUIDE

South Australia

Current market snapshot

Observed 2 October 2026, 12:17 pm Brisbane. ASX Base Strip Settle, AUD/MWh; 10 minutes delayed. No separate settlement timestamp was shown. These are not closing prices.

CY2027

\$81.40

AUD/MWh

+3.73% since 3 Sep

CY2028

\$93.57

AUD/MWh

+1.68% since 3 Sep

FY2029

\$100.44

AUD/MWh

+2.31% since 3 Sep

Same product. Two recorded snapshots.

AUD/MWh

FY2029 is a financial-year product, not CY2029. Changes compare recorded snapshots, not monthly averages or closing sessions.

A current benchmark, without a seasonal prediction.

What has changed

CY2027, CY2028 and FY2029 are respectively 3.73%, 1.68% and 2.31% above the 3 September observations. The three named products cover different delivery periods.

No validated South Australian seasonal study accompanies this edition. We make no preferred-month claim and do not borrow another state's pattern.

A practical next step

Use these benchmarks as one input to a retailer tender matched to your site's demand, renewal dates and budget. Compare all fees, contract terms and the cost of high-price periods.

Fixed energy pricing can improve certainty, subject to pass-through terms. Spot-linked supply leaves more wholesale exposure with you; do not choose it solely to wait for a cheaper month.
